THE TROY DIRECTORY,

FOR THE YEAR

1864:

INCLUDING

LANSINGBURGH, WEST TROY & GREEN ISLAND,

ALSO, A

Business Directory,

A RECORD OF THE

CITY GOVERNMENT,

ITS INSTITUTIONS, &c., &c.

VOLUME THIRTY-SIX.

PUBLISHED BY ADAMS, SAMPSON & CO.,

PRINCIPAL OFFICE, 91 WASHINGTON STREET, BOSTON, MASS.

TROY:

YOUNG & BENSON, BOOKSELLERS AND STATIONERS,

No. 216 RIVER STREET,

Entered according to Act of Congress in the year 1864, by ADAMS, SAMPSON & Co., in the Clerk's Office of the District Court of the Northern District of New York.

TO OUR PATRONS.

The great change made in the style and general appearance of our City Directory this year will be readily observed by all who are in the habit of consulting its pages; by increasing the size to that of an octavo and reducing the size of type sufficiently to admit of two columes being printed on one page, enables us on opening the book to present at one view 280 names; while in the old book there were only 80 names on the two corresponding pages; this we believe to be an improvement, for it greatly facilitates the finding of names, it requiring one-fourth less leaves to be turned over to find a name than has formerly been necessary; the book is also made less bulky, and more uniform in appearance with the Directories for all other large cities in the country.

We trust that our efforts in this direction will meet with a just appreciation from the public. It is and has ever been our aim to produce a Directory for Troy which its citizens may well be proud of, and we feel this issue is another step towards accomplishing this object.

The continued watchfulness and care which are needed in preparing a work of this kind have been faithfully bestowed on this volume, yet while we do not claim to have attained perfection, we do feel confident that no work of the same character is to be found containing fewer omissions or mistakes, and we assure such persons as find themselves incorectly entered that they cannot regret it more than we do, and that special efforts will be made to prevent the same error occuring in future editions.

We have been compelled to slightly increase the price this year, viz: from $1.25 to $1.50. This we were loth to do, but the extremely high prices of paper, printing &c., have rendered such increase absolutely necessary.

Our thanks are once more due to the patrons who have so generously aided us by their advertisements and subscriptions, and to the citizens at large for their courtesy to our convassers.

Washington Market, Second, corner Division.
Wotkyn's Block, First, corner Congress.

SURGERY FOR THE EYE AND EAR.

Notice.

Dr. LISTON offers his services to perform every operation upon the Eye and Ear which the science of the Old and New Worlds has shown to be advisable, and will use all new and efficient instruments and remedies as used in the best Institutions in Germany, France, England, and in this country.

Cross Eyes Straightened.

Cataracts Removed.

Artificial Pupils Formed.

Inflamed Eyes Cured, and their cause removed.

In-Turning Eye-Lids, are often caused, by rubbing the eye-winkers upon the eye; we have restored sight that had been lost for thirty years from this cause, and constant suffering at once removed.

Out-Turning Eye-Lids are at once cured, and original beauty restored to the face.

Diseased Lids thickened along the edges, red, casting off scales, or gummed together, we cure readily.

Granulated Lids, in their worst form, entirely cured.

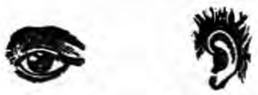
Watering, or "Weeping Eyes," speedily cured.

TUMORS in every form removed or treated.

Opthalmoscopic examinations of the Eye, &c., &c., &c.,

Dr. LISTON.

Entered according to Act of Congress.



Catarrh, Polypus AND THROAT.

ALBANY GENERAL INFIRMARY, 115 Grand Street,

Established, A.D., 1858.

Courses of Study.

The following are the General Courses of Study of the Institute, each commencing with Division D, and extending over a period of four years, viz:

1.—Course in Civil Engineering.
2.—Course in Mechanical Engineering.
3.—Course in Topographical Engineering.
4.—Course in Natural Science.

Upon the completion of any one of these General Courses, Students are admitted to the corresponding Degree of Civil Engineer, (C. E.,) of Mechanical Engineer, (M. E.,) of Topographical Engineer, (T. E.,) or of Bachelor of Science, (B. S.)

Terms of Admission.

Previously to examination, the candidate must present testimonials of good moral character to the Director of the Institute.

For admission to Division D, at the opening of the Winter Session, the candidate must be at least 16 years of age, and pass satisfactory examinations in Arithmetic, Geography, English Grammar and the Elements of Algebra. For admission to advanced standing, at the opening of either the Winter or Summer Session, the candidate must be correspondingly older, and pass satisfactory examinations in the same, and also in all the previous studies of the Division which he proposes to enter.

Sessions and Vacations.

The scholastic year is divided into two Sessions. The first or Winter Session consists of twenty-one weeks, and is followed by a vacation of one week. The second or Summer Session consists of twenty weeks, and is followed by a vacation of ten weeks.

The scholastic year of 1864—65 will commence on the 14th of September, 1864.

The Annual Register, giving full particulars, may be obtained at YOUNG & BENSON'S Bookstore, or from

*This column includes only those policies on which the premium has been paid: others made out, but not taken, are not included.

†Fractions of a dollar omitted.

‡The guaranty stock of the Company was $100,000 — one-half of which was paid in by the subscribers in cash, — which amount was returned in 1853.

§Extra amount paid in 1847, as per charter, to make up $1,000 deficiency of payment of interest in 1845.

‖Including surplus distributed in 1853, 1858, and 1863.

¶Additional cash distributions made, in 1853 and 1858, to old members, in consideration of their contribution to the fund for the redemption of the guaranty stock — in compliance with Sect. 8, of the charter of the Company.

REPORT

OF THE

Directors to the Members, at the Annual Meeting,

DECEMBER 21, 1863.

At the present Twentieth Anniversary Meeting, members find our Company still on its onward course in the increase of members, and augmentation of means for future growth and prosperity. The termination of the past year brings round the fourth distribution of surplus funds, and suggests a short retrospect of the preceding five years, during which, as appears from the annexed Statement, we have issued 6,366 policies, insuring $18,328,336.00; adding 3,177 policies which were outstanding at the last distribution in 1858, insuring $10,410,101.00, the whole number is 9,543 policies; and the amount insured, $28,753,437.00, showing that about two-thirds of the whole number have been issued, and nine-fourteenths of the whole amount has been insured, during the past five years.

During the five years, 3,056 policies have terminated by surrender, expiration, and loss; leaving the number now outstanding 6,487; insuring nearly twenty millions of dollars.

The annual losses have, of course, been greater in number as the number of risks has increased; and there has been, during the last two years, an increase of the proportion of military and naval risks, at an extra rate of premium.

At the outbreak of the rebellion, the question of the expediency of taking those risks was promptly considered by the Directors as being one of importance personally, to many who were already members. It was also of importance to the families of the members. If any facility could be given to the public service by taking those risks to a not excessive amount, then not only the members themselves, their families, and those dependent upon them, amounting to between 20,000 and 30,000, if we estimate five individuals on an average to be liable to be affected by an insurance; but still further, if the general welfare was concerned in such risks being taken, then any person, though not directly interested in a life insurance, yet had an indirect interest in these risks being taken to an extent which should not jeopardize the responsibility of the Company, since it is also a matter of interest to the public that every company, the concerns of which, like those of ours, are extensively mixed up with those of the community, should be so prudently conducted as not only to avoid the danger of breaking down, but also to guard against giving occasion for doubts of its soundness, even though such doubts might be groundless.

A difficulty occurred, for want of statistics and experience, for estimating the degree of the extraordinary risk. Under these circumstances, the Directors decided to make as good an estimate of the value of the risk as they could, and to make a distinction in favor of old members who had already paid to the Company a considerable amount standing to their

credit in the funds of the Company towards meeting the loss, if one should occur; and also a distinction between combatants and non-combatants, and to take only those who had others depending upon them, and to limit the amount to be taken on one risk, and not to insure a greater amount in the whole on such risks than would be certain to come within the probable amount of the distribution to be made at this time, though the whole amount insured upon these risks should be lost, a result too far beyond probability to be dreamed of by even the over-cautious. A company of less experience and means might have had more reason to hesitate. As it is with our Company, the experiment may be now considered as being decidedly successful. The rate charged has been sufficient to indemnify the Company for the risks, without excessively burthening the parties insured, and the Directors thank the members for cheerfully acquiescing in the course pursued. The accounts show some reasonable surplus receipts upon these risks, which has not been brought into the estimate for the present distribution, but remains as indemnity to the Company for the future.

The rate of mortality among the members of the Company continues to be below that due from us, according to the best vital statistics; and there is no reason to apprehend that it will exceed that rate, except in some years of very extraordinary mortality, and even then the extraordinary loss of life can hardly be expected to be co-extensive with the territory over which our business is spread. The extent of surface and amount of business are thus a security against great disturbance of the course of business, by local and temporary causes.

The whole number of deaths, since the organization of the

Company, has been 490; the number of claims thereon 531; and the amount paid to surviving families and parties interested, $1,451,396. The amount paid, during the past five years, has exceeded $825,000, or more than fifty-six per cent. of the entire payments on loss-account.

Deaths have occurred from the following causes, and in the numbers given in the subjoined table, viz:—

138	Persons	died	of	Consumption.
116	"	"	"	Fevers, (mostly typhoid—3 puerperal and 2 lung fevers.)
37	"	"	by	accidents.
31	"	were	killed	in battle.
22	"	died	of	dysentery.
13	"	"	"	cancer.
11	"	"	"	dropsy.
11	"	"	"	various brain diseases.
11	"	"	"	"heart disease."
10	"	"	"	apoplexy.
9	"	"	"	cholera.
8	"	"	"	"liver complaint."
8	"	"	"	debility.
7	"	"	"	erysipelas.
7	"	"	"	pleurisy.
5	"	"	"	"disease of the kidneys."
5	"	"	"	"congestion of the lungs."
5	"	perished	by	their own hands—(insanity.)
5	"	died	from	"unknown" causes.
4	"	"	"	"fits"—two distinctly epileptic.
3	"	"	of	bronchitis.
3	"	"	"	small pox.
3	"	"	"	inflammation of the bowels.
2	"	"	"	neuralgia.

2	persons	died	of	"scrofula."
2	"	"	from	"dissipation."
2	"	"	"	exposure and exhaustion.
2	"	"	"	rupture of a blood-vessel.
1	"	"	"	peritonitis.
1	"	"	"	"chronic splenitis."
1	"	"	"	tetanus.
1		"	"	paralysis.
1	"	"	"	dyspepsia.
1	"	"	"	yellow fever.
1	"	"	of	gout.
1	"	"	"	rheumatism.

490 deaths.

It appears that about one-half of the deaths proved to have taken place have been reported in the certificates and other evidences of decease to have been occasioned by consumption and fevers, which are accordingly, as in all bills of mortality, the leading causes of death. The fevers were of divers descriptions, and the proportion of deaths by consumption does not vary materially from that usually presented in bills of mortality, although it is not improbable that a broader sense is given to consumption, in some of the certificates, than would come under the strict meaning of that term.

In conducting the business of Life Insurance, vigilance, skill, and the exercise of sound discretion in discriminating and selecting risks are essential, and not only a reasonably judicious management at the central office is requisite, but also the appointment of intelligent, honest and trustworthy agents at other places; and also skilful and faithful examining physicians. Accordingly, good appointments for these functions are of much importance in order to constitute an organ-

ization strong enough to resist the attempts of those (though fortunately not very numerous) unscrupulous applicants, who are willing that the chances of advantage in a joint concern shall be exceedingly in their own favor. A very large majority of the applicants, however, are perfectly honest and truthful, but then men, especially when they are making an application, may be inclined to consider their prospect of long life quite as good as that of other men; accordingly, applicants, and even sometimes the examining physician, when they hesitate to make a direct categorical answer to an inquiry, say "as good as men in general"; or, which is still less within their knowledge, "as good as those in general who are taken by insurance companies."

It therefore happens, unavoidably from these causes, that no life insurance company can have all the benefit from a selection which they would have under a perfect diagnosis of the applicant's ailments, and a frank and full disclosure of his habits and constitutional symptoms and mortal tendencies. Every life company, therefore, has to maintain an unceasing defense in warding off risks which are below the average rate presented by the ordinary bills of mortality; and the experience of such companies does not, in fact, present a materially better expectation of life than those bills do for lives over sixteen years of age, so that some of those tables of mortality, the Carlisle for instance, are in use, and of good authority in deciding rates of mortality to be adopted in computing the rate of premiums. Our own experience, as has been said from time to time, continues to be below the ordinary rate of mortality,—partly because some of the risks in the bills of mortality are excepted by the policy; and partly because applicants, whose expectation is in fact below the average standard of admission,

are declined; and also because others are declined on account of the ancestral record presenting instances of deaths by inheritable diseases, the presumptions from which are not rebutted by the circumstances of the particular case. Accordingly, the pressure to obtain insurance upon bad risks may be so resisted and countervailed as to reduce the ratio of deaths to the whole number of risks below that presented by the ordinary bills of mortality.

In the early stages of our Company, applications were not unfrequently made by husband and wife each for insurance for the benefit of the other. Cases occurred in our experience which suggested a doubt of the expediency of an indiscriminate practice of insuring the life of a married woman for the husband's benefit, even though the application by either or both might be made in good faith from a desire to bequeath a pecuniary benefit, or leave a token of regard. There are adequate and unobjectionable and usually laudable motives between either and third parties, and also between husband and wife, when either has a pecuniary interest in the other's life, or dependence upon the other for support; and in some cases the husband has such dependence on her life, but such an interest or dependence cannot, as a general rule, be presumed in favor of the insurance for the husband's benefit, though instances are not wanting. In this case, as in all cases, it is a matter of prudence in conducting an insurance company of any kind, marine, fire or life, to avoid insurance without interest, upon mere speculation by what are called wagering policies. There is, of course, uncertainty, and a calculation of chances is to be made, in all contracts of insurance, as there is in all contracts of suretyship and indemnity, but this does not render them gambling contracts

like games of hazard. The same is true of life insurance, no less than maritime risks and those of fire. The rule adopted by the Company, accordingly, has been to presume an insurable interest of the wife in the life of the husband, and the want of such interest on his part in that of the wife, such presumption being subject to be rebutted in either case by the circumstances of the particular case.

The main incidental expenditure of our Company, like that of every insurance company, much of the business of which is necessarily conducted through agencies, will be in proportion to the amount of business so conducted; and so far this expense, in a prudently conducted company, will be an index of its activity and success. Thus far the Company has not deemed it expedient to carry on the bulk of its home business through agents, presuming that the character of the Company can be pretty well known to those of our neighbors, at least, who may make enquiry.

Our incidental expenses, including commissions to agents, have amounted to a fraction more than nine per cent. on the amount of receipts for the past year, as shown by the annexed Statement, and eight per cent. only for the entire twenty years.

The annexed Statement shows a reduction of the amount at which our building stands on our books, it being deemed expedient to apply any surplus of rents, over interest on the cost, in this manner, until it shall stand at a valuation which, in any contingency, shall not exceed its value as a vendible property.

It is well understood that our members have the election to receive distributions in cash, or in payment of future premiums, or in reduction of the rate of the future premiums, (which is equivalent to purchasing an annuity,) or by an addition to the amount insured by the policy, (which is thus

far the payment of a single premium for the whole life.) When the distribution is settled by an addition to the amount insured, it is of course done by a new examination and certificate, for which there is the same reason as on the original application. This privilege of election, out of the different modes of settling the distribution, has been considered convenient to members, since one or another form of settlement will be preferable to a member according to his object in making and keeping up the insurance, and his pecuniary means at the time and the other uses he can make of the amount. In our experience, hitherto, fewer members have elected a reduction of future premiums, or addition to the amount insured by the policy, than was at first expected. It is to be observed, that such reduction of the future premiums will not reduce the amount of future distributions, and the addition to the amount insured by the policy will augment the future distributions proportionally.

In determining the rate of distribution, a computation is made of the amount to be first reserved for payment of future losses and expenses. This computation is made upon the basis of the table of the combined experience of seventeen London companies, with which that of twenty-nine years of the Gotha Company, (being larger than any other company in Germany,) agrees almost exactly; and that of thirty-three years of the Economic Assurance Company, of London, agrees with it substantially. In computing the distribution, the estimate is made upon what has been actually realized and is on hand, wholly independent of expectations for the future, and is intended to show the condition in which the affairs of the Company could be wound up at the time. Members are, of course, not indifferent to the amount of the distribution, but the predominating consideration is, that

their expectations, in behalf of their survivors, may be sustained by a sound and strong Company. For this purpose, it is necessary not only to make a just computation of the future losses and contingencies which are to be provided for; it is equally requisite that the means for meeting those losses and contingencies should not be over-estimated, and that distributions should not be upon the basis of temporary inflations in the market, or speculative anticipations.

The Directors, accordingly, assure our members and the public, and refer them to the annexed Statement for confirmation, that our investments are not put at an excessive valuation. They stand, for the most part, at cost, being in the aggregate somewhat under the present market rate.

According to the principles adopted in former distributions, the computation for the present distribution stands thus:—

Reservation for re-insurance at the tabular rate, ...		$ 1,890,000.00
Estimated deterioration of lives, amount of losses not heard of and other contingencies,		160,239.77
		$ 2,050,239.77
Amount of surplus for distribution on policies outstanding November 30, 1863, . .		748,000.00
		$ 2,798,239.77

Occasionally, a member is urgent for small reservations and large distributions, and the same member will be no less urgent for low premiums, without perceiving the inconsistency of expecting large distributions out of low rates of premium. Since the rate of distributions is governed, in a great degree,

by that of the premiums, though not wholly, for prudence, economy and skill in management, and the extent of business come largely into the account; but, other things being equal, the rate of distribution of surplus must depend in the long run upon that of the premiums. There is, however, with some exceptions, a pretty uniform rate of premium both abroad and in this country. It is obvious to any member that, in estimating the real amount of premiums paid by him, he must deduct the proportion returned to him in distributions every fifth year. Suppose he pays an annual premium and does not remain over any distribution, the net premium really paid by him is higher than if he stays over it. And this is right, for if he insures for a short period, or voluntarily drops his policy, it is a matter of his own election. If his risk ends in a loss, he has made a great bargain, though a fair one, for his representatives. But if he is to stay in the company over one distribution, then, all other circumstances being equal, he is interested, and the longer he continues a member the more he will be interested in having a liberal rate of premium, liberal reservations, and, as a consequence, handsome distributions, and, at the same time, a better security against the unfavorable turn of the risks or other drawbacks, of which more or less will occur to every company. Therefore, the true policy of the Company for solidity and perpetuity, and the true interest of the individual member, are the same. The Directors reiterate this doctrine to the members, being thoroughly assured of its vital importance.

By a computation upon the principle by which the present and former distributions of 1848, 1853 and 1858, have been made, there remains a fund for distribution to present members of forty per cent. of the amount of premiums paid in during the five years.

Our present cash distribution is equivalent, at ages 20 and 25, to an additional insurance, amounting to *more than the premium actually paid in*, and at ages 30 and 35, to nearly that sum.

If a person aged thirty, insured, in 1844, for $5,000, had applied his distributions to increase the amount insured, instead of receiving the cash therefor, he would now have, payable at his decease, the sum of $6,529.

It appears from the annexed Abstract of the business of the Company during the twenty years ending November 30, 1863, which is believed to be as complete a history of the Company's operations as can be given, that the gross receipts of the Company have amounted to nearly six millions of dollars. The sum of $1,247,000 (including $748,000 now declared) will have been returned to members *in cash*; the families of deceased members, and others interested in policies on which losses have occurred, will have received more than $1,451,000. The cost of conducting the Company's operations has not exceeded an average of eight per cent. per annum upon the receipts. During this period of twenty years, and the issuing of fourteen thousand and five hundred contracts for insurance, the name of the Company has appeared upon court records but three times under a claim for loss, being about once in seven years; not one case has been carried before a jury, and only a single case (one in which reference was offered and peremptorily declined by the party interested—a creditor) has been adjudicated upon in a court of law, and that was settled in favor of the Company.

Such are some of the results of a large business extending over a long period, which the Directors have the satisfaction of submitting to the members and the public.

EXHIBIT

OF THE

BUSINESS AND PROPERTY OF THE COMPANY,

NOVEMBER 30, 1863.

4759	policies issued during the four years to December 1, 1862, insuring the amount of	$13,577,650.00	
1607	policies issued during the past year, ...	4,745,686.00

A Policy of Life Insurance is the cheapest and safest mode of making a certain provision for one's family.—*Benjamin Franklin.*

A Policy of Life Assurance is always an evidence of prudent forethought; no man with a dependent family is *free from reproach* if not Assured.—*Lord Lyndhurst.*

There is nothing in the commercial world which approaches, even remotely, to the security of a well-established and prudently-managed Life Insurance Company.—*Professor De Morgan.*

There is no more advantageous or secure form of investment than a Life Policy in a Mutual Company. In the NEW ENGLAND MUTUAL LIFE INSURANCE COMPANY it is the best investment that can be made; for, under all circumstances, you get good interest for outlay of premium paid, and in case of sudden or unexpected death, the legal representatives of the party insured are largely the gainers.

NEW ENGLAND
MUTUAL LIFE INSURANCE CO.

Cash Assets, Jan. 1st, 1864 - - - $3,000,000.
Last Cash Return [now being paid], 750,000.

40 PER CENT IN CASH PAID TO ALL INSURED.

This Company, established in Boston, Mass., in 1843, is the oldest and most reliable wholly Mutual Life Insurance Company in the United States, and has been uniformly successful, having always made large returns in cash to all the Policy-holders. Last cash return, just declared, and now being paid, 40 per cent., amounting to $750,000, and leaving a large surplus besides.

It is strictly a benevolent institution for mutual protection, entirely beneficent in all its workings and tendencies, and is an excellent form of investment.

By the last report of the Insurance Commissioners, the surplus of Assets *over* liabilities was proportionately greater than any Life Insurance Company in the United States Expenses proportionately "*less*" than any other Company.

This Company, being purely mutual, insures at the lowest possible rates; and if the premiums paid exceed the *actual cost*, the surplus is returned to the parties insuring.

Every fifth year, at the time of declaring the return to members, the business is, as it were, closed, so that its actual position and solvency are made manifest at that time, and the surplus funds are divided *pro rata* among all the insured. This guards the assured against any possible loss from ineficiency on the part of the Company, and is a sure guarantee as regards the future.

Insurance may be effected for the benefit of married women, beyond the reach of their husbands' creditors. Creditors may insure the lives of debtors.

Parties at a distance may insure from blanks, which will be supplied and forwarded free of expense.

Printed Documents of an interesting character, showing the benefits of the Mutual plan, and the advantages generally of Life Insurance that this Company has to offer, supplied gratis, or forwarded, free of expense, by addressing

JOHN HOPPER, Agent & Attorney for the Co.,
110 BROADWAY, cor. Pine st., New York City.

BENEFITS OF LIFE INSURANCE.

The principles of Life Insurance are now so well established, that they are no longer matters of experiment, and its advantages are beyond dispute.

The great and special advantage is the securing of wife and children against want and misery after the death of the husband and father. Every one acknowledges the wisdom and prudence of providing for a family against the adversities of fortune, or the accidents of life, and it is the moral, social, and religious duty of every one, not to abandon those dependent upon him to the cold charities of the world, and liable to the temptations and sufferings of poverty, when deprived of his protection and support. The late Lord Chancellor of England declared, that "no man with a dependent family is free from *reproach* if his life is not insured." The man who neglects to insure his house is condemned for imprudence. How much more improvident is he who refuses to insure his life? Every house may not be burned, but every man *must* die. Bishop Hawkes wisely declares, that "Life Insurance is not only a humane, but almost a Christian institution," for the Apostle says: "If a man provide not for his own, and especially for those of his own house, he hath denied the faith, and is worse than an infidel."

This important duty of every head of a family may be easily and securely performed by obtaining a Policy of Life Insurance. A very small daily saving will accomplish this purpose. Five cents a day, commencing at the age of twenty-one, will insure one thousand dollars at death, whether immediate or remote, together with all the profits which may accumulate on the policy; and six cents a day, at twenty-eight years of age, will accomplish the same object And by the judicious laws of Massachusetts and New York, policies issued for the benefit of widows and orphans, are protected from the husbands' creditors. *The question is not whether one can afford to insure, but rather whether he can afford not to insure.*

Can it be that any father, husband, or man, is unwilling to make a little sacrifice of daily comforts, in most cases of what would be unnecessary expenses, to protect those most near and dear to him from suffering and want after his death?

There are many other advantageous uses of Life Insurance, besides the security of a family against want. Creditors can insure the lives of their debtors as a security for their claims. A man with incumbrances upon his property may insure to the amount of them, to secure their ready payment at his decease. A young man may borrow money to complete his education, or may obtain credit for a stock of goods, or tools, or a farm, by insuring his life and assigning the policy as contingent security. A parish may relieve their clergyman from anxious care by raising a small sum to insure his life, and provide for his family. In short, Life Insurance is applicable to all purposes of raising money on loans, where only personal security can be offered; and, generally, as affording means of certain indemnity against any pecuniary loss, claim, or inconvenience whatsoever, to which one individual may become subject, by reason of the death of another.

The moral and social influence of Life Insurance is no slight benefit both to the individual and to the community. It develops the amiable and generous traits of character, accustoms a man to think for others, induces habits of industry, economy, and accumulation, and by relieving the mind from anxiety and over-exertion, promotes health and longevity. A *systematic* adoption of Life Insurance, by the people of any country, would do more to eradicate pauperism and crime than all the combined wisdom of its legislators; so that a well-founded, well-conducted institution of this description is a subject of public interest, as its beneficial effects are at least equal to those of any charitable, philanthropical public institution; and these effects are produced without any donation, sacrifice, or act of beneficence by the public or by individuals, being the natural and easy results of the spontaneous thrift, prudence, and forecast of individuals in conducting their own concerns.

SECURITY OF LIFE INSURANCE.

Life Insurance Companies are the most stable and permanent institutions known among men. The experience of the commercial world can point to no such permanency, nor do any class of institutions compare with Life Companies for uniformity, safety, and reliability. The insured cannot invest their funds in a more sure and profitable manner; for Life Insurance is simply setting aside and investing a yearly sum, with the certainty of a safe return with accumulations; whereas other investments, with a profitable and sure return, are not so easily found, and often end in an entire loss.

An investment in a policy of Life Insurance is far preferable to deposits in a Savings Bank. An Insurance Company accomplishes all that is done by a Savings Bank, and much besides, combining all the advantages of the latter with an indemnity against risks. Like the Savings Bank, it takes care of the depositor's money, and it virtually allows him interest upon his deposits: but it does more. What is of higher importance to the depositor, the Company engages, in consideration of a certain sum of money paid to it annually, during the life of the depositor, to pay a much larger sum to his family upon his decease.

There are *three reasons* why a Life Insurance policy is a wiser investment than a deposit in a Savings Bank: 1. Money in a Savings Bank, being entirely at the will of depositors, is too easily drawn out to gratify some passing desire, and there is no strong motive to compel a regular deposit. How many persons have commenced an account with a Savings Bank, and continued for some time with a laudable perseverance, but at last have been tempted to withdraw, and never had sufficient confidence to commence again! In Life Institutions, a man, after mature deliberation, *binds* himself to make a deposit of a specified sum at a specified time; knowing this, he provides for it, and we can safely say, that in a majority of cases the money saved to deposit in a Life Institution, *would not be saved at all, had they not insured.* 2. Money in a Savings Bank is exposed to the demand of creditors, while an Insurance policy is s not liable for a man's debt, being held by a special law of the State, as a fund for the benefit of his family; and thus, in times of pecuniary disaster, to which every man is more or less liable, it often becomes a means of support when everything else is gone—cheering with ease and competence the declining years of those who, without its aid, would have been left to all the miseries of poverty and old age. 3. *Life is uncertain, while death is certain;* and a Savings Bank makes provision only for life. The average length of human life is only thirty-three years. Of 500 persons, only one lives eighty years, and of 100 only six live sixty-five years. Those who can cheat themselves into the belief that they run no risk of dying, will not, of course, insure. No one, however, need consult books to learn lessons of mortality. 'Tis the burden of pulpit eloquence; the lesson of the graveyard; and the teaching of every day's experience. The uncertainty of life being admitted, it will follow that accumulation upon the Savings Bank principle, does not meet the requirements of the case.

To illustrate: suppose a husband and father, thirty-three years old, wishes to leave his family the sum of $2,000, and for that purpose deposits annually $50 in some Savings institution. In the course of thirty or forty years he will thus accumulate the required sum. But what guarantee has he that he will live ten years, or even one year? He has none, and, of course, no security for provision for his family. But, if he pays $50 as an annual premium for a policy of Life Insurance, he will be SURE of leaving $2,000 to his family *whenever* he dies—in six months or twenty years. Thus, while all other means are fluctuating and uncertain, and riches often "fly away," a Life Insurance policy (if from a reliable company) is certain, and becomes a patrimony JUST AT THE TIME IT IS MOST NEEDED.

The question is no longer, SHALL I GET MY LIFE INSURED? but rather, WHERE CAN I INSURE IT TO THE BEST ADVANTAGE?

In answering this question, it will be necessary to explain, briefly, the

DIFFERENT KINDS OF LIFE INSURANCE COMPANIES.

They are all based upon the same fundamental principles, but are divided into classes, according to the different plans of their organization and the different methods of conducting their business. They are either *Stock*, *Mixed*, or *Mutual* Companies.

Joint Stock Companies issue at fixed rates, the *profits* being WHOLLY divided among the proprietors, and the enormous dividends thence divided have, in some cases, raised the value of the stock to *seven hundred per cent.* upon the amount paid in.

Mixed Companies are also Joint Stock Companies with proprietary bodies, but the assured are allowed to participate to a certain extent with the proprietors in the profits of the business.

Mutual Companies are owned and managed *exclusively* by policy-holders, *all of whom* have their proportionate *share* in the surplus accruing from the business.

The *Mutual* Company is clearly the most perfect in *principle*, and experience has fully tested and placed beyond a doubt the *perfect security* of the system. No Mutual Company, when once well established, has ever met with disaster on account of the mutual principle; but, on the other hand, they have rapidly accumulated funds, reaching sometimes in amount to millions of dollars. In Mutual Companies, too, the assured have entire control of the funds; there is "universal suffrage," and the form of government is essentially "democratic." A Mutual Company divides the *whole* surplus among the insured, after deducting only the actual cost to the Company of carrying on the business, which is not the case with the first class mentioned, and only in a *degree* with the Mixed companies. This plan of operation insures the applicant at the *owest possible* premium, for all that is over the sum required to insure him safely, is returned in dividends, which is not the case with the Stock companies, and only partially so with the Mixed companies, the proprietary body in the latter having first to receive its share of the surplus before a dividend can be declared to the insured.

The Governor of Massachusetts has recently vetoed a bill to incorporate a Life Insurance Company, because, among other reasons, it was not a Mutual company, a nd had no limit as to its expenses. He says: "Purely Mutual Life Insurance Companies have been proved, by experience, to be the safest and best for the insured."

A PURELY MUTUAL COMPANY IS, THEN, THE ONE IN WHICH TO INSURE TO THE GREATEST ADVANTAGE.

SUPERIORITY OF THE NEW ENGLAND LIFE INS. CO.

It is a purely Mutual Company, and has made four distributions of surplus funds (1848 1853, 1858, and 1863) in *cash*, amounting to OVER $1,500,000. It now has a well invested fund of $3,000,000, which is much more than sufficient to meet all possible contingencies and make a large return to all the insured besides.

The New England Mutual Life Insurance Company do not pay their dividends in scrip, but always in CASH. At the close of every five years the Company, after paying the expenses of the business, reserving a sufficient sum to reinsure all risks, and cover all possible contingencies, divides the surplus proportionately among the assured. By this plan, there is no accumulating scrip, or possible liability to guard against; and the rates of premium are materially lessened by the cash dividends, the insured reaping the immediate rather than the prospective advantages of the mutual plan. Some Companies are compelled by their charters to *credit* their distributions on the policies in the form of a bonus, payably only when a loss takes place, thus creating an immense and unnecessary capital, and depriving the members, in case of non-payment of premium, of all right to the bonus. In this Company, the distributions are a source of pecuniary relief in paying future premiums, and in times of great financial distress, are sensibly felt. *In no event* does the bonus (if a member choose so to apply his distribution) *become forfeited.* The cash distribution in 1863 amounted to $750,000.

Its *standing* and *economy* are unequaled. The Insurance Commissioners of Massachusetts, in their last report to the Legislature, compare the standing and the economy of the eighteen Life Insurance Companies which issue policies in that State, comprising the principal companies in the country; and they place the New England Company FIRST in *standing*, i. e., in its ratio of

value to liability, and FIRST in *economy*. This Company's expenses are only 8 per cent. of the receipts, while those of the others *average* more than 11 per cent.! This is the *oldest* Mutual Company in the country, and, for that reason, must be the safest and most economical.

Its Directors are well known to community as men of integrity, sagacity, and experience in business; and *every year* the affairs of the Company are thoroughly investigated by a body of Commissioners chosen by the State of Massachusetts, for that purpose; and a full and complete statement of the operations of the Company, with its assets and liabilities, is made to the Legislatures of Massachusetts and New York, and a report is made to the assured, of the condition of the Company. Every five years, at the time of declaring the dividends, the business is, as it were, closed, so that its actual position and solvency are made manifest at that time. This guards the assured against any possible loss from inefficiency on the part of the Company, and is a sure guarantee as regards the future.

☞ The New England Mutual Life Insurance Company has deposited with the Comptroller of the State of New York, $100,000 for the security of its policy-holders in this State.

A company in which so shrewd a financier as the late ABBOTT LAWRENCE, and so profound a lawyer as the late RUFUS CHOATE, insured their lives to the largest possible amount, needs no other voucher for its economy, stability, and perfect security.

TERMS OF PAYMENT.

The terms of payment of the premium in the plan adopted by the New England Life Insurance Company, while ignoring entirely all uncertainty arising from the credit system, are peculiarly advantageous to the assured.

PREMIUM may be paid quarterly, semi-annually, or annually; or one-half of the amount of five premiums may lie over on notes for a term of years, on whole life policies, interest being charged at the rate of six per cent. per annum, on the deferred portions. Premiums for the whole life may also be settled in ten annual payments, or in a single payment.

This is not insuring on credit; for the Company gets pay, from time to time, previously to running the risk—the interest on the note being taken into the account. The notes, or any part of them, will be demandable after five years from the date of the first one, on notice of ninety days, so that the Company may have command of their funds, should the same be necessary; but it is not supposed that such notes will ever need to be paid. There can be hardly a doubt that the principal may remain outstanding so long as the assured wishes.

Five annual life premiums being double the amount of the cash premium required for an insurance for the term of five years, it follows that the policy is adequate collateral security for a loan to the amount of one-half of the life premium. The Company, by this rule, never insures upon the personal credit of any member, its loans being restricted to those policies only which have a pecuniary value. The Company also aids those members who have paid several life premiums in cash, by affording them a credit in times of pecuniary distress, for subsequent premiums, to an amount equal to what would be paid them on surrender of the policy.

In this Company a person cannot forfeit a policy until its value is worked out in insurance. For example, if a person pays four life premiums *in cash*, this will insure him seven or eight years, or about three years after his four have expired, if he is unable, from any cause, to pay the annual premiums.

SURRENDER OF POLICIES.

It sometimes happens that the motive for making insurance ceases before the policy has expired. Instances will also occasionally occur of persons being disappointed of the means of paying the premium, and so being liable to forfeit their policies. In such case, *the Company consents to a surrender of the policy upon fair terms*, if application is made for that purpose before it is forfeited.

All over and above the actual cost will be returned of the premiums paid.

Now is the time to effect an insurance! As a man grows older, the rates of premium are higher, and his health is liable to fail. Life is uncertain, and delays are dangerous!

A good and popular form of policy, and one much in vogue, is a policy for life, the whole premium being paid in ten annual installments (which installments may be paid quarterly, or ortherwise); and if, before the expiration of the ten years, the payments are discontinued, a paid-up policy will be given for an amount proportionate to the premiums paid. On this form of policy a dividend is payable during the whole life of the insured. This form of policy enables the insured to make all the payments due on the policy in the prime of his life, thus guarding against future misfortune.

TAKE NOTICE.

☞ A party out of the city desiring to insure, may go before a respectable physician to be examined, and fill up the questions in the application with plain answers, yes or no, as the case may be. The doctor will also fill up the medical certificate on the application, and forward the same to this office, and I will send him the usual fee, upon receipt of the application, even if the risk should not be accepted by the Company.

Any further information will be promptly given, and blanks forwarded free of expense when desired.

Is one of the best mediums in northern New York, for profitable advertising. Rates moderate, and advertisements well displayed.

Price of Subscription, $6.00 a year.

THE WEEKLY PRESS,

Issued from the same office, has a large and increasing country circulation. Liberal terms made with advertisers.

Terms of Subscription, $1.50 a year, in advance.

In clubs of 10 or more copies to one address, $1.00 a year.

TROY DAILY WHIG
STEAM PRINTING ESTABLISHMENT.
NO. 213 RIVER STREET,
TROY, N. Y.

H. W. GREENE & CO., - - - - PROPRIETORS.

Troy Daily Whig, - - - - $8.00 per annum.
Troy American (Weekly), - - 1.00 " "

THE TROY DAILY WHIG

Is the oldest, largest, and only morning paper published in the city, and affords an excellent medium for advertising.

THE JOB PRINTING OFFICE

Connected with this establishment is one of the largest in the city, being furnished with three CYLINDER PRESSES, and a very extensive assortment of JOB TYPE. Orders for every description of JOB WORK promptly and neatly executed.

WEST TROY ADVOCATE,

PUBLISHED EVERY WEDNESDAY MORNING AT
NO. 39 BROAD STREET, WEST TROY.
J. S. HOLLANDS, Editor.

TERMS: $2 Per Annum.

As this sheet has a large and continually increasing local circulation, MERCHANTS AND OTHERS will find it an invaluable medium for making known their business to the inhabitants of West Troy, and vicinity.

TERMS MADE KNOWN ON APPLICATION.

JOB PRINTING

Also executed at FAIR PRICES, and in a neat and expeditious manner, at this office.

THE TROY DAILY TIMES.

The Cheapest, Best Conducted, and Largest Circulated Journal out of New York City.

TERMS: $7.50 Per Annum to Mail Subscribers, Payable in Advance.

PUBLISHED AT NO. 211 RIVER STREET, TROY, N. Y.

THE TIMES

Is a first class Newspaper; original in its features, and enjoying a high reputation at home and abroad. It has been recently materially enlarged. It has a larger circulation by thousands than any other paper here, and larger, it is believed, than any in the State out of the Metropolis.

The Times is an Unsurpassed Medium for Advertising.

THE TROY WEEKLY TIMES.

Is also a Journal of large circulation, and a desirable advertising medium.

TERMS: $1.50 Per Annum in Advance.

JOHN M. FRANCIS, Publisher & Proprietor,
No. 211 River Street.

JOB PRINTING.

☞ Connected with the TIMES is a NEW JOB PRINTING OFFICE, furnished with new materials of every kind, including the latest FAST PRESSES, for the rapid execution of all descriptions of printing. Orders executed with neatness and dispatch at the LOWEST NEW YORK CITY RATES, and work done when promised.
